Rules

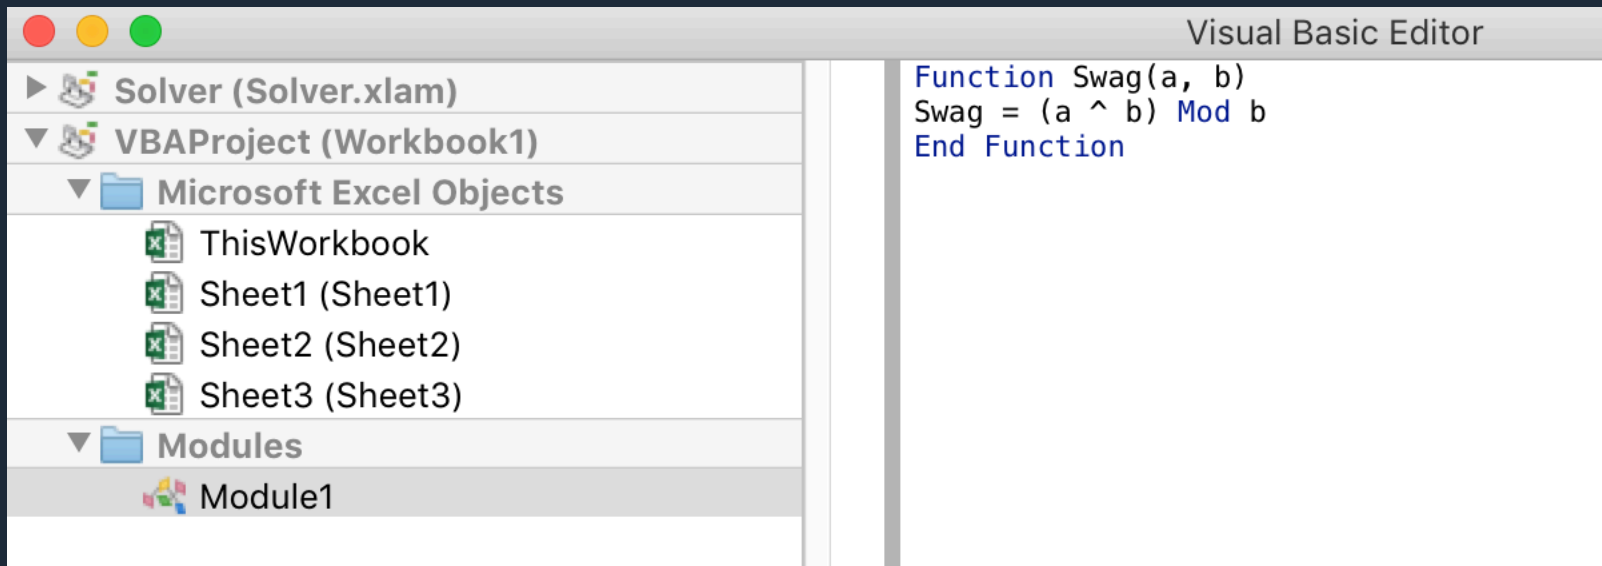

- The teams will be made up of Left and Right halves of the room. Think of a team name!
- Objective is to score as many points as possible.
- The problem / point value will be projected.
- First team to post a correct answer to the problem on the BAC facebook wall wins: www.facebook.com/SternBAC (specify your team name)
- Team with the winning points will receive a mysterious prize

For 100 Points

- Write your own functions `swag`:
 - Take in 2 integers
 - Find their average
 - Take that result and modulo by the second integer
 - Return final result
 - Name this function `swag`
- Hint: $a \text{ modulo } b$ is the remainder after a/b (i.e. 5 modulo 3 is 2), performed in Excel via *$a \text{ Mod } b$*

Solution: 100 Points

```
Function Swag(a,b)  
Swag = (a^b) Mod b  
End Function
```

VBA-pardy

For 200 Points

- Write your own functions `datecheck`:
 - Take a date (ex: 1/1/2013) and an integer representing day of week
 - Check if the date matches up with the integer
 - *weekday* function should return TRUE if date matches up with the integer, FALSE otherwise
- Hint: `Weekday("10/24/2015")` returns 7, representing Saturday
 - Sun = 1, Mon = 2, ..., Sat = 7

Solution: 200 Points

```
Function datecheck(d, n)  
  dayofweek = Weekday(d, 1)  
  datecheck = (n = dayofweek)  
End Function
```

Insert Function		AutoSum		Recently Used	Financial	Logical	Text
255	 			<i>fx</i>	=WEEKDAY(A1)		
	A	B					
1	42301	=WEEKDAY(A1)

VBA-pardy

300

400

500

For 300 Points

- Write your own subroutine `multtable`:
 - The subroutine should generate a multiplication table like the following
 - For instance, `cell(3,4)` should give the value 12, `cell(5,7)` gives 35, etc.
- Hint: consider using a loop within a loop

	A	B	C	D	E	F	G	H	I
1	1	2	3	4	5	6	7	8	9
2	2	4	6	8	10	12	14	16	18
3	3	6	9	12	15	18	21	24	27
4	4	8	12	16	20	24	28	32	36
5	5	10	15	20	25	30	35	40	45
6	6	12	18	24	30	36	42	48	54
7	7	14	21	28	35	42	49	56	63
8	8	16	24	32	40	48	56	64	72
9	9	18	27	36	45	54	63	72	81

Solution: 300 Points

```
Sub multtable()  
For Row = 1 To 9  
For Col = 1 To 9  
Cells(Row, Col) = Row * Col  
Next Col  
Next Row  
End Sub
```

VBA-pardy

Solution: 400 Points

```
Cells(1, 10) = "5D MA"
```

```
five_day_ma_col = 10
```

```
If (Cells(Row + 1, return_col) <> "") And (Cells(Row +  
2, return_col) <> "") And (Cells(Row + 3, return_col)  
<> "") And (Cells(Row + 4, return_col) <> "") Then  
Cells(Row, five_day_ma_col) = (Cells(Row, return_col)  
+ Cells(Row + 1, return_col) + Cells(Row + 2,  
return_col) + Cells(Row + 3, return_col) + Cells(Row +  
4, return_col)) / 5  
End If
```

VBA-pardy

500

For 500 Points

- Modify buySellSignal:

- Fill Column K with Buy/Sell Signal
- If $3D > 5D$, we should BUY
- If $5D > 3D$, we should SELL

	A	B	C	D	E	F	G	H	I	J	K
1	Date	Open	High	Low	Close	Volume	Adj Close	Return	3D MA	5D MA	Buy or Sell
2	10/23/15	52.299999	54.07	52.25	52.869999	134828500	52.869999	0.01089866	0.00213112	0.00351344	SELL
