

Installing Weka

Windows Users

1. Download and unzip the [\[datamining_workshop.zip\]](#) file from [bit.ly/bacdata](#)
2. Double click the [\[weka-3-6-13jre.exe\]](#) and click [\[next\]](#), then click [\[I Agree\]](#)
3. The window will ask you to choose components, make sure that the boxes [\[Associate Files\]](#) and [\[Install JRE\]](#) are checked
4. A new Oracle window should open asking to install Java. Click [\[Install\]](#) on this new window and allow the installer to run, once this completes click [\[Close\]](#)
5. Now your original Weka installer window should continue running, once completed click [\[Next\]](#) on the installer
6. Click [\[Finish\]](#) and start Weka

Mac Users

1. Download and unzip the [\[datamining_workshop.zip\]](#) file from [bit.ly/bacdata](#)
2. Drag the [\[Weka-3-6-12-oracle-jvm.app\]](#) file to your [\[Applications\]](#) folder
3. Type [\[Command+Space\]](#) and type [\[System Preferences\]](#)
4. In System Preferences click on [\[Security & Privacy\]](#)
5. Click on the [\[General\]](#) tab
6. Click the lock icon on the bottom left of the window and enter your password in the window that opens
7. Next you'll be able to change the [\[Allow apps downloaded from:\]](#) setting to [\[Anywhere\]](#)
8. Now go back to your applications folder and double click the [\[Weka-3-6-12-oracle-jvm.app\]](#) from your [\[Applications\]](#) folder and a Weka window should open
